**Abstract.** *The article examines the peculiarities of the socio-economic development of Ukrainian enterprises. The result of the study was a generalization of proposals for improving the situation in the sphere of social and economic development of Ukrainian enterprises. The significance of the study lies in the understanding of the need to implement economic and social measures capable of bringing the development of Ukrainian state enterprises to a qualitatively new level.*

**Keywords:** *socio-economic development, enterprises, state, indicators*

The article examines the peculiarities of the socio-economic development of Ukrainian enterprises, taking into account the fact that it must be carried out in accordance with the conditions for the safe existence of society in all its spheres. The need for an in-depth study of the development of enterprises at the current stage determines the relevance of the topic of the article.

The aim of the study was to characterize the indicators of socio-economic development of countries, compare them in developed countries and in Ukraine, as well as provide recommendations for further economic and social development of the Ukrainian state, taking into account international experience.

**Methodology.** The methodology of

scientific research is based on the dialectical method, which summarizes all the phenomena and processes occurring in the field of international economic relations in its relationship and interdependence. In the process of writing the article used methods of analysis, synthesis and comparison - in the study of the application of indicators of socio-economic development in the process of assessing the functioning of national economies and in analyzing the levels of economic freedom; monographic - when presenting consistent material related to the specified research topic; abstract-logical - in substantiating the logic of the application of measures of economic and social nature, aimed at the progressive progress of the Ukrainian state in the context of international

economic relations.

The result of the study was the generalization of proposals to improve the situation in the field of socio-economic development of Ukraine based on international experience and the involvement of the Ukrainian state in international economic relations. *As a result*, it was found that the indicators of socio-economic

development of Ukraine indicate the need to find ways to improve the situation in the country. The *significance* of the study lies in understanding the need to implement measures of economic and social nature, taking into account international experience that can bring the Ukrainian state to a new level of its development.
